► This form pertains to OCal System Plans. If you are certified by CCOF as organic rather than OCal, refer to the [Uncertified Handler Affidavit](#) instead for incorporation into your Organic System Plan.

This affidavit is required for any of the following:

- Uncertified storage facilities used by CCOF operations to store unsealed product or product in permeable packaging.
- Uncertified brokers, traders, wholesalers, distributors or importers who take title or physical possession of organic and/or OCal products supplied to CCOF certified OCal operations.

This affidavit is not required for:

- Uncertified storage-only facilities used by CCOF operations to store sealed product or product in impermeable packaging.
- Commission/fee brokers who do not take title or physical possession of organic and/or OCal products.
- Uncertified handlers supplying organic and/or OCal product in sealed, impermeable containers with final retail labeling that identifies the organic and/or OCal status and original certified producer.
- Private label owners who purchase ingredients that are shipped directly from a certified supplier to a certified co-packer, and shipping documentation links to certified supplier.

CCOF operations must work with their purchasing department to determine if uncertified suppliers are used.

- The uncertified handler must answer the questions below. A new affidavit is required only if there is any change in the future, including a change in management of the uncertified handler.
- Copies of the OCal Uncertified Handler Affidavit (UHA) must be kept by both the CCOF certified operation and the uncertified handler entity. This affidavit and any sample audit trail records will become part of the CCOF certified operation's OCal System Plan (OSP).
- CCOF certified operations will be billed an initial and annual fee for each OCal Uncertified Handler Affidavit, outlined in the CCOF Certification Services Program Manual. CCOF certified operations can avoid this fee by sourcing from certified handlers.

Brokers, traders, wholesalers, distributors, importers, and storage facilities are considered handlers per USDA NOP § 205.2 "Handle, Handler". NOP § 205.101(b)(1) and [NOP Guidance 5031](#) do not require certification if organic products are packaged or otherwise enclosed in a container prior to being received or acquired. Organic products must remain in the same package or container and may not be repacked or re-labeled while in the control of the uncertified handler.

3 CCR § 10102 does not require certification of licensed commercial cannabis operations that do not handle cannabis products to be labeled, sold or represented as OCal if: (1) OCal products are packaged or otherwise enclosed in a container prior to being received or acquired, and (2) OCal products remain in the same package or container and are not repacked or re-labeled while in the control of the uncertified handler, except for Bureau sampling.

B. Audit Trail Records

CCOF certified operations may only source from uncertified handlers who provide full supplier traceability back to the last certified operation for each shipment. We find the following to be essential for traceability:

- Purchase invoices, BOL, and other audit trail records must:
 - Designate products as organic and/or OCal AND
 - Include a description of the product and amount transferred. You may strike out pricing information, provided organic and/or OCal status and quantity is legible.
- Uncertified handler records and the last certified operation's records must link:
 - The last certified operation must be listed on invoices AND/OR
 - Lot numbers applied by the last certified operation must match lot numbers on uncertified handler audit trail records.
- For each shipment, uncertified handlers must provide a complete, current organic and/or OCal certificate for the last certified operation.
- Documents generated by the last certified operation proving purchase, delivery, and/or transfer to the uncertified handler must be provided to the CCOF certified operation.
 - Uncertified handler audit trail records must link directly back to the last certified operation, including transport, storage, processing/handling, shipping, and/or distribution. Documents must show that organic and/or OCal integrity was maintained; organic and/or OCal products did not come into contact with non-OCal or nonorganic products or prohibited materials such as fumigants.
 - For organic imports, documentation must show that imported organic products have not been treated upon entry to the USA. Documentation for each shipment may include import permit, phytosanitary certificates, transaction certificates, NOP Import certificates, CBP Forms 3461 and 7501, commercial invoices, export packing list, Certificate of Origin, Bill of Lading, Waybills/Air Waybills, AMS Inspection Certificate, Marine Surveyor Report, and other documents.
- All certified suppliers must be approved by CCOF as part of the certified operation's OCal System Plan (OSP). Notify your CCOF certified buyer prior to changing suppliers.

CCOF certified operations must maintain records sufficient to demonstrate compliance. If CCOF inspectors cannot track organic and/or OCal product back to the last certified operation, sourcing organic and/or OCal products from the uncertified handler may be considered a noncompliance.
