Exempt Handler Affidavit Instructions

- 1) The CCOF-certified operation completes section A on the following page. This affidavit and any sample audit trail records will become part of the CCOF-certified operation's Organic System Plan (OSP).
- 2) The uncertified handler completes sections B through F. If an exempt, uncertified handler works with multiple CCOF-certified operations, a separate Exempt Handler Affidavit (EHA) is required for each CCOF-certified operation as activities may vary.
- 3) A new Exempt Handler Affidavit (EHA) is only required if there is any change in the future, including a change in activities or management of the exempt handler. An updated EHA may be requested by CCOF at any time.
- 4) CCOF-certified operations will be billed an initial and annual fee for each Exempt Handler Affidavit (EHA), outlined in the [CCOF Certification Services Program Manual](#). Refer to the table in section C. If an EHA is submitted but not required or approved by CCOF, billing does not apply.
- 5) **Certification (not this affidavit) is required for any of the following:**
 - a) Storage facilities or warehouses receiving organic product that is not in sealed, tamper-evident* packaging.
 - b) Storage facilities where unpackaged product is loaded or unloaded before being loaded into the next transport vehicle (transporter not required to be certified unless otherwise handling).
 - c) Broker, traders, wholesalers, or distributors who sell organic products that are not in sealed and tamper-evident* final retail packaging.
 - d) Importers of organic products into the United States.
 - e) Exporters of organic products for sale in the United States.
 - f) Private label or brand owners who purchase organic ingredients for their co-packers.
 - g) Private label or brand owners who sell organic products in nonretail packaging or sell finished organic products in packaging that is not sealed or tamper-evident* unless private label brand owner can demonstrate exemption.
 - h) Transporters and transloaders who pack, repack, treat, sort, open, enclose, label, or otherwise handle organic products. These activities are not considered transportation.
 - i) Transporters and transloaders who combine, split, or containerize organic products where the activity of combining, splitting, or containerizing is not contracted by a certified organic operation or is not described in a certified operation's Organic System Plan (OSP).

Brokers, traders, wholesalers, distributors, importers, private label brand owners, and storage facilities are considered handlers per NOP § 205.2 "Handle, Handler". Exemptions from certification requirements are outlined in NOP § 205.101 and [Strengthening Organic Enforcement Final Rule](#) section A.
- 6) ***Tamper-evident packaging** is packaging or a container that is sealed in a manner where an attempt to break the seal, access the contents, or reclose the package would be obvious. For 205.101(e) exemption to apply, either the retail or nonretail package must be sealed and tamper-evident. For 205.101(f) exemption to apply, the retail package must be sealed and tamper-evident, the nonretail package is not relevant.
 - a) **Examples of nonretail tamper-evident packaging:** Produce boxes with "DO NOT TAMPER WITH" tape placed across box flaps, sealed bulk bags of flour, sealed drums or totes of olive oil.
 - b) **Examples of retail tamper-evident packaging:** Aseptically sealed jars, boxes of individually wrapped granola bars, clamshells with sticker closing the clamshell, zip-top produce bags sealed with sticker or strip that consumer must rip off to open, salad container with film top that must be ripped off to open, produce individually wrapped in plastic, mesh bags with a label that seals the bag and must be ripped off to open.
 - c) **Examples of packaging that is NOT tamper-evident:** Clamshells without a sticker closing the clamshell, unsealed zip-top bags, mesh bags with a closure that could be removed without damaging the packaging or label, produce with PLU label not enclosed in any packaging, baled hay.
- 7) A helpful resource to determine if certification is required is CCOF's [Organic Certification Self-Assessment](#).

E. Audit Trail Records

Uncertified Handler – CCOF-certified operations may only work with exempt handlers who provide full traceability back to the last certified operation for each shipment. The following are required for traceability:

- 1) Nonretail containers used to ship or store organic products must identify product as organic and display the production lot number, shipping identification, or other unique information that links to the audit trail records.
- 2) Purchase invoices, receipts, bills of lading (BOL), and other audit trail records must:
 - Designate products as organic AND
 - Include a description of the product, date of transaction, and amount transferred. You may strike out pricing information, provided organic status and quantity is legible.
- 3) Exempt handler records and the last certified operation's records must link:
 - The last certified operation that handled the product must be listed on exempt handler invoices/records AND/OR
 - Lot numbers applied by the last certified operation to nonretail containers must match lot numbers on exempt handler audit trail records AND
 - If product passes through multiple uncertified exempt operations in sequence, documents must trace product lot number through all uncertified operations back to the last certified handler.
- 4) For each shipment, exempt handlers must provide a complete, current organic certificate for the last certified operation.
- 5) Documents generated by the last certified operation proving purchase, delivery, and/or transfer to the exempt handler must be provided to the CCOF-certified operation.
 - Exempt handler audit trail records must link directly back to the last certified operation, including transport, storage, processing/handling, shipping, and/or distribution. Documents must show that organic integrity was maintained: organic products did not come into contact with nonorganic products or prohibited materials such as fumigants.
- 6) All certified suppliers must be approved by CCOF as part of the certified operation's Organic System Plan (OSP). Notify your CCOF-certified buyer prior to changing suppliers.

Exempt operations must maintain records per NOP § 205.101(i). CCOF-certified operations must maintain records per NOP § 205.103. If CCOF inspectors cannot track organic product back to the last certified operation, sourcing organic products from the exempt handler may be considered a noncompliance.

F. Exempt Handler Statement

I, the owner or legally authorized representative, attest that I am qualified to assess the validity of the statements in this affidavit and the statements are true and accurate to the best of my knowledge. Note that per NOP 205.100(c)(2), any person falsifying statements to an accredited certifying agent shall be subject to the provisions of section 1001 of title 18, United States Code.

I acknowledge the above requirements for audit trail records and disclosure to the CCOF-certified operation and understand that failure to meet the audit trail record requirements or disclose records to the CCOF-certified operation may be cause for CCOF to rescind approval of my operation as an approved exempt organic handler and may be cause for compliance action against the CCOF-certified entity.

CCOF reserves the right to inspect any facility storing or handling organic product owned by a CCOF-certified operation per NOP 205.400(c). If the exempt handler misrepresents policies or procedures as stated on this affidavit or acts in a manner that might jeopardize organic integrity or tracking of the organic product, the CCOF-certified operation working with the exempt handler will be notified. The CCOF-certified operation will be held responsible for correcting any noncompliance issues. CCOF will report uncertified handlers who are handling organic products but are not exempt to the USDA NOP for investigation and potential civil penalties.
