

Supplier Attestation Document for Organic Ingredients Destined for Mexico

The Mexican Organic Products Law (Ley de Productos Orgánicos) requires that ingredients used in products sold in Mexico comply with the requirements in the Mexican regulations. Suppliers of ingredients to the final processor may self-attest that the ingredient meets the requirements listed below. CCOF has developed a list of crops that are at high risk of being grown with these materials and/or methods. See www.ccof.org/mexico for the current list of high-risk crops. Crops at high risk for sodium nitrate use include carrots, celery, some cole crops, fresh tomatoes, some leafy greens, some grains, onions, potatoes, tobacco, some citrus. Crops at high risk for hydroponic or aeroponic production include container grown annual crops (excluding annual seedlings) and container grown strawberries.

CCOF Client:

Forward this attestation to your ingredient supplier of high-risk ingredients used in products to be sold as organic in Mexico. They must complete and sign this form and you must retain a copy for your records.

Ingredient Supplier:

Complete this attestation regarding products provided to the CCOF operation who sent you this document. Any authorized, knowledgeable member of the supply chain for these products may complete this attestation. Sign and return to the CCOF certified operation.

Attestation:

Company Name: _____
